# Application instructions – Self-adhesive window film

1 In order to apply the film properly, please clean glass, thoroughly and apply only to a flat surface.
2 Measure to the size required using the grid on the backing paper – please allow 2 mm distance to the window frame – cut film carefully.
3 Spray glass with enough water.

4 Remove backing paper completely and position film on the glass.

4.1

5 Spray film surface with water. Using a squeegee, remove moisture starting from the centre out to the edges.
